

Smarter Financial Insights. Instantly

Access all the numbers and text in financial statements, including footnotes

BUILT BY ANALYSTS, FOR ANALYSTS

Calcbench is an interactive financial data platform that extracts and catalogs fundamental and footnote data from SEC filings (10-Ks, 10-Qs, 8-Ks, Proxy Statements, and Earnings Releases), enabling precise, flexible analysis of disclosures.

Calcbench is trusted by Fortune 100+ corporations, the SEC and other regulators, big four accounting firms, top asset management firms (by AUM), and leading universities.

True-to-Source Data

Feel confident in your data - it's all traceable back to the source.

Dynamic Model Building

Extract data systematically, through our API, online platform, or an Excel/ Google Add-in.

Point-in-Time Data

Avoid look ahead and survivor bias.

Earnings Press Releases

Pull KPIs, non-GAAP metrics and guidance data in real time.

Flexible Search

Filter by company, sector, index or disclosure type. Retrieve specific sections of disclosures.

Seamless comparisons

Analyze peers or time series without stitching data together.

“ I go deep on pension data, uncertain tax positions, the contractual obligations table, and more.... The risk factors are especially important to explore and are easily accessible using Calcbench. ”

Portfolio Manager and Accounting Analyst
