

**Data Quality Committee**  
**Washington D.C.**  
**October 5, 2023**  
**Meeting Notes**

**Attendees**

Committee Members

Campbell Pryde, Shelly Wavrin, Charles Kessler, Pranav Ghai, Glad Sully, Brian Bracey, Mohini Singh, Amit Varshney

Absent

Adrian Cloutier, Jennifer Liu

Staff

Ami Beers, David Tauriello, Marc Ward

Observers

Louis Matherne, Iza Ruta

**Welcome**

- Shelly welcomed attendees and introduced the agenda.

**Minutes Approval**

- Motion to approve minutes from July 6, 2023 DQC meeting, by Campbell Pryde, seconded by Mohini Singh
- Vote (For 8, 0 Against)
- Motion passed. July 6, 2023 DQC meeting minutes approved.

**Review and Approval of Final Version 22 DQC Rules**

- Campbell introduced Version 22:
  - Rule DQC\_0088 Operating Lease Cost and Expense - This rule identifies filings where the filer has reported the operating lease expense and variable lease expense but not the operating lease cost. A second component of the rule checks that operating lease expense is not included in the calculation of LeaseCost. The intent of the rule is to allow filers to check that their filing is consistent with the FASB's XBRL implementation guide.
  - Rule DQC\_0159 Financial Statement Abstract Concepts - This rule identifies when the filer has not used all three financial statement abstract concepts in a filing. The rule identifies the presentation statement networks in the filing and checks that the networks identified include the abstract elements

IncomeStatementAbstract, StatementOfFinancialPositionAbstract, StatementOfCashFlowsAbstract. If one of these elements is missing from the filing then an error is generated. This rule applies to both US GAAP and IFRS filings.

- Rule DQC\_0160 Descendants of Nonrelated Party Members -This rule identifies when the filer has defined a member descendant of the element NonrelatedPartyMember and when the RelatedPartyMember is not included as a sibling to NonrelatedPartyMember.
- Rule DQC\_0161 Single Member Disaggregation - This rule identifies when the filer has used a single dimension member on one of the following axes:
  - VariableRateAxis,
  - RetirementPlanFundingStatusAxis,
  - InvestmentTypeAxis,
  - RetirementPlanTaxStatusAxis.
- Rule DQC\_0162 Trading Symbol - This rule identifies where the filer has used an invalid or inconsistent trading symbol. The rule checks that the trading symbol does not include invalid characters, identifies if the symbol is not applicable, and the symbol is upper case. This rule applies to both US GAAP and IFRS filings.
- Rule DQC\_0163 Segment Expenditure Addition to Long-Lived Assets - The rule is intended to ensure that filers use the element SegmentExpenditureAdditionToLongLivedAssets in the segment rather than the cash flow element or PPE additions element. This rule identifies where the filer has used the elements PaymentsToAcquirePropertyPlantAndEquipment or PropertyPlantAndEquipmentAdditions in the segment tables ScheduleOfSegmentReportingInformationBySegmentTable, or ScheduleOfRevenuesFromExternalCustomersAndLongLivedAssetsTable and has not included the element SegmentExpenditureAdditionToLongLivedAssets in the table
- Rule DQC\_0164 Use of Location Axis - The rule is intended to identify inappropriate use of the Location Axis in the taxonomy. The rule has 3 different checks on the following axes:
  - BalanceSheetLocationAxis,
  - IncomeStatementLocationAxis,
  - OtherComprehensiveIncomeLocationAxis
- This rule was adjusted during public review to remove identification of the following line items used with the BalanceSheetLocationAxis due to false positive results:
  - FairValueAssetsMeasuredOnRecurringBasisUnobservableInputReconciliationLineItems
  - FairValueLiabilitiesMeasuredOnRecurringBasisUnobservableInputReconciliationLineItems
- There was an exception added to the rule, the rule will not flag when sharebasedcompensationlineitem is on the IncomeStatementLocationAxis
- Rule DQC\_0165 Useful Life of Leasehold Improvements - This rule supports FASB guidance for the reporting of the useful life of term leases. If the element PropertyPlantAndEquipmentUsefulLifeDescriptionOfTermExtensibleEnumeration is used with a value of UsefulLifeTermOfLeaseMember, then this implies that no value would be provided for the concept PropertyPlantAndEquipmentUsefulLife. If the useful life is the actual term of the lease then the extensible enumeration does not have to be provided. This rule identifies where the filer has used the

extensible enumeration element  
PropertyPlantAndEquipmentUsefulLifeDescriptionOfTermExtensibleEnumeration  
with LeaseholdImprovementsMember on the  
PropertyPlantAndEquipmentByTypeAxis with a value of  
'UsefulLifeTermOfLeaseMember'.

- Rule DQC\_0166 – Facts without Hypercubes - This rule identifies where the filer has created facts with dimensions that do not fit into a hypercube defined in the extension taxonomy.
  - Rule DQC\_0174 Conditional NonNegs – This rule identifies where filers have reported a negative value for the concept FinancingReceivableAllowanceForCreditLossesIndividuallyEvaluatedForImpairment1. The rule identifies where the value is negative but does not produce false positives where in some cases the value can be netted against the collectively evaluated for impairment element.
- Motion to approve rules DQC\_0088, DQC\_0159, DQC\_0160, DQC\_0161, DQC\_0162, DQC\_0163, DQC\_0164, DQC\_0165, DQC\_0166, and DQC\_0174, effective December 1, 2023 by Pranav Ghai, seconded by Mohini Singh
  - Vote (For 8, 0 Against)
  - Motion passed. DQC\_0088, DQC\_0159, DQC\_0160, DQC\_0161, DQC\_0162, DQC\_0163, DQC\_0164, DQC\_0165, DQC\_0166, and DQC\_0174 for effective December 1, 2023.

### **Review and Approval of Version 23 DQC Rules for Public Review**

- Campbell introduced Version 23 proposed rules:
  - Rule DQC\_0167 – Inconsistent Calculation Roots -The rule is intended to detect those filings where filers have not defined the calculation linkbase correctly for the Balance Sheet, Income Statement and Statement of Comprehensive Income.
  - Rule DQC\_0168 – Tax Reconciliation Calculation - This rule identifies where the filer has not reported a calculation linkbase for the monetary and rate-based tax reconciliation in a 10-K or 20-F filing.
  - Rule DQC\_0169 – Calculation in the Parenthetical Disclosure - This rule identifies where the filer has defined a calculation in the parenthetical disclosure network of a Statement.
  - Rule DQC\_0170 – ECD Rule 10b51 Flag Disclosures - This rule identifies where the filer has not reported the ECD Rule 10b51 Flag Disclosures that should be reported with a value of false if they had no such disclosures to make. The rule identifies if this flag is not reported in 10-K and 20-F filings with a document period end date after 2023-12-31. The rule checks if the following 4 flags defined in the ECD taxonomy are missing:
    - Rule10b51ArrAdoptedFlag,
    - NonRule10b51ArrAdoptedFlag,
    - Rule10b51ArrTrmntdFlag,
    - NonRule10b51ArrTrmntdFlag
  - The SEC ECD taxonomy requires that these 4 flags are tagged even if the values are false.

- Shelly proposed a change to allow for one flag to be tagged, rule will be updated.
- Rule DQC\_0171 – ASU 201613 Transition Elements - This rule identifies where the filer has reported ASU 201613 Transition elements in the filing. The rule will flag fact values with an end date greater than 2023-09-30 using one of these elements. Exceptions include:
  - FinancingReceivableAllowanceForCreditLossesIndividuallyEvaluatedForImpairment1,
  - FinancingReceivableAllowanceForCreditLossesCollectivelyEvaluatedForImpairment,
  - ImpairedFinancingReceivableAverageRecordedInvestment,
  - ImpairedFinancingReceivableWithNoRelatedAllowanceAverageRecordedInvestment,
  - HeldToMaturitySecuritiesInUnrealizedLossPositionsQualitativeDisclosureNumberOfPositions
- Rule DQC\_0172 – Reporting Right of use Assets – This is an IFRS rule. The rule detects where filers have reported RightofuseAssets but not included it on the Statements and have used the element PropertyPlantAndEquipment instead of the correct element PropertyPlantAndEquipmentIncludingRightofuseAssets.
- Rule DQC\_0173 – IFRS Transition Elements - This rule identifies concepts in the IFRS taxonomy that are being transitioned and that should not be used in filings after 2023-01-01.
- Rule DQC\_0152 – FASB guidance allows for lists of years for a fact value for the Tax Period Axis.
- DQC will approve these rules for public review in November via email for a public review starting November 15, 2023. Additional rules are expected to be added to this version which will be sent to DQC members for approval via email prior to release.

Meeting adjourned 12:00 PM after which, DQC held a closed session
